
AGENDA ITEM SUMMARY

Subject: Discuss acceptance of the Wayfinding Project

Background Summary:

Signs and More, LLC was the General Contractor for the Wayfinding Project. The construction work has been completed, final paperwork submitted, and we can proceed with the acceptance of the project.

In 2017, the City Council retained the Corbin Group to develop a wayfinding plan for the City of Charles City. This project was the implementation of Corbin's wayfinding study and plan. The project included gateway/welcome signs, vehicular guide signs, parking lot identification signs and information kiosks. The gateway/welcome signs, information kiosks, and parking lot identification signs were identified as separate alternate bid items. All the alternates were selected and included in the wayfinding signage project.

The project was completed less than the original bid amount of \$157,427.99. The total project cost was \$152,680.11, and the amount of the final payment is \$10,696.43.

We plan to have the project's acceptance and authorization to make the final payment on the March 1st City Council meeting agenda.
