## AGENDA ITEM SUMMARY

---

**Subject: Request for Livestock on City Limits – Mules on Cleveland Avenue.**

---

### **Background Summary:**

Mike and Jamie Reicherts forwarded the following message to me following a phone conversation requesting the ability to keep mules within city limits.

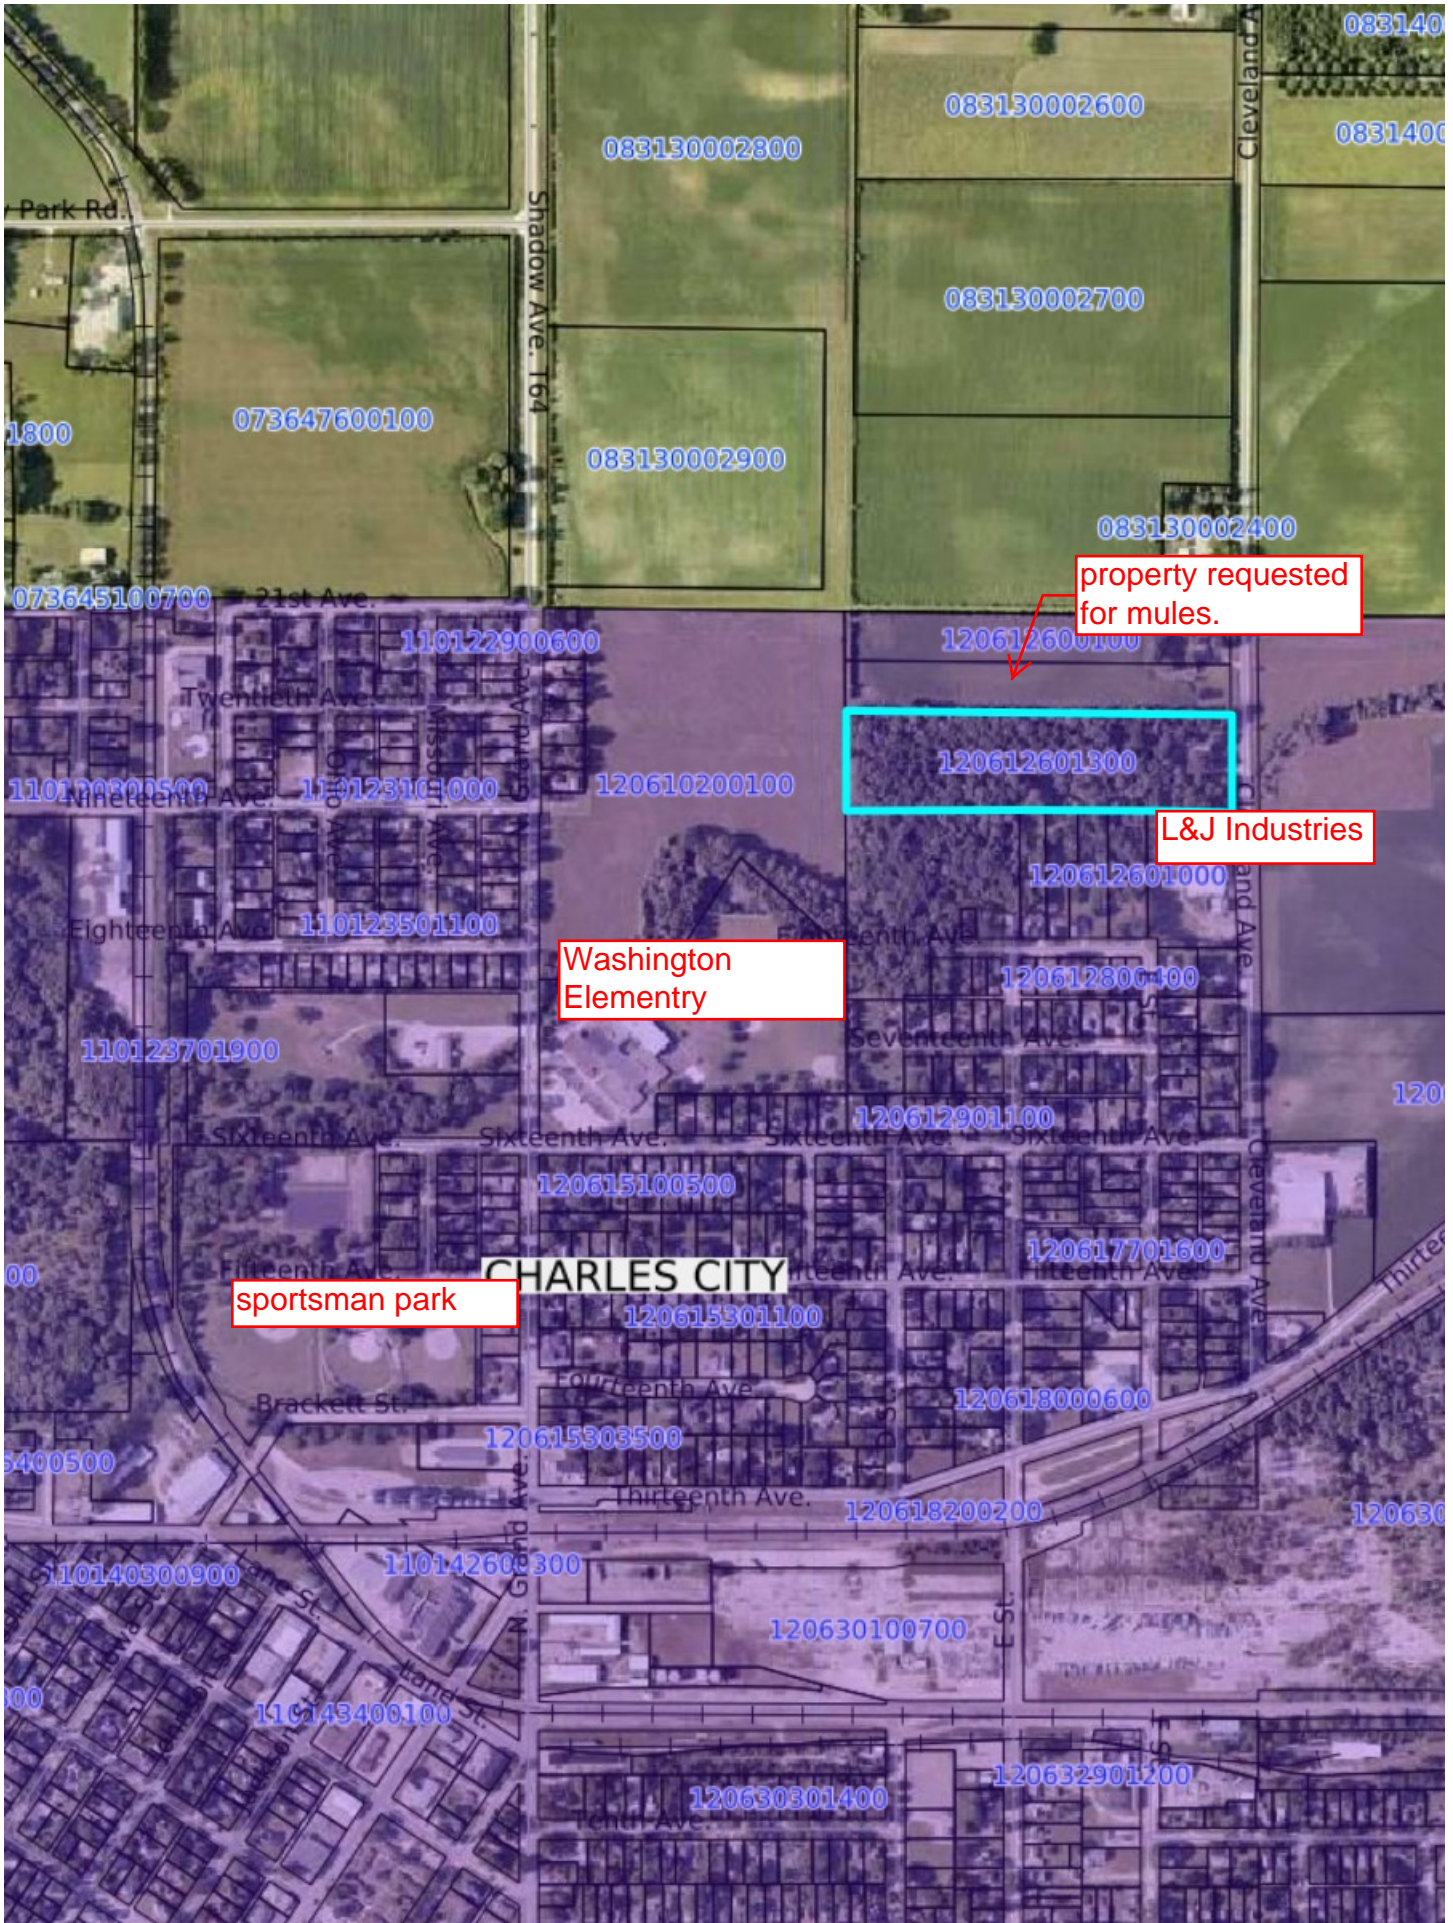

*We are interested in purchasing a piece of property north of L&J welding. It is on 1903 Cleveland Ave. The property is 10 acres of heavily wooded land. We would like to put four mules on this property as my husband is a Cowboy Chaplin and we use them in our ministry. We would need to clear some trees to make a border fence around the property.*

*We would also need to put up some buildings to accommodate us.*

*Thank you for your time.*

Chapter 55.03 Livestock - grants the city council permission to allow livestock within city limits. As you can see from the attached overhead map the location being requested is at the northern city limits of the community and is generally removed from other properties or many adjacent neighbors. John can confirm zoning but I believe it is Conservation/M-1/M-2 industrial zoning which would be more compatible than residential or commercial.

Mike and Jamie Reicherts will be present at the meeting to answer questions you may have.

property requested for mules.
