Re: Traffic Signal pole repair/replacement on Gilbert

We are pleased to provide you with the following quote for doing the signal repair/replacement work on Gilbert that you talked with the guys about on site a couple weeks ago week.

Gilbert and Brantingham spin pole in NW corner while city welds on pole \$1,200.00

Gilbert and Main replace pole in SW corner: \$32,500.00

Price Includes:

- New footing moved approx. 2' south
- New pole similar to new ones we installed last year
- Removal of old footing and pole
- Re-circuiting signal wires to new pole

Notes: Due to instability in the steel market this pricing is good for thirty days. After 30 days we may have to re-quote. Current lead time on new signal poles is around 20 weeks

Thank You
