

AGENDA ITEM SUMMARY

SEWER CAMERA Replacement

Background Summary: - Steve & Cory

The street department's current sewer camera is in need of replacement. The current camera is down and replacement parts for the repair are no longer available due to its age. The current camera was purchased in 2009.

This new sewer camera is equipped with a high-definition lens and powerful lighting systems that can capture detailed images of the sewer system. The camera is mounted to a tractor, together they are capable of detecting blockages, leaks, and other issues that may be present in the sewer system.

Owning this equipment allows us to identify and address issues in a timely manner, preventing potentially costly repairs and minimizing disruption to different neighborhoods. The purchase of new sewer cameras is essential for maintaining the city's infrastructure.

Cost to replace this piece of equipment is \$25,505 and would come out of the sewer department funds. This is item was not a cost that we had anticipated for the current budget year, however it is necessary to maintain our level of service with the sewer collection system. We respectfully request that the City Council approve the purchase of a new sewer camera for the street department.
